

WESTSIDE FAMILY HEALTH CENTER

a california *health+* center

Care. Compassion. Community.

Exceptional Health Care for All

Health care is *neither* a privilege *nor* just a right. It is an absolute, basic human *necessity*.

Today's fast changing political climate and the hurdles of our shape-shifting health care system have made it more difficult than ever to deliver quality care to our most vulnerable populations.

For 47 years, Westside Family Health Center has sought to be a haven for multiple generations of patients.

First founded as a women's clinic, Westside Family Health Center now provides comprehensive, high quality, cost-effective health care in an educational and supportive environment that empowers patients to take an assertive role in caring for their well-being through all stages of life.

We are a safe place in the community where women, children and families are treated with dignity and respect, and receive the kind of health care they deserve and that is recognized as the best. We bring humanity to health care.

2021: Our New Home

We address the health care issues of today and tomorrow in a new, advanced setting that offers **state-of-the-art care to twice as many patients as we could in our previous site.**

In 2019, we launched a \$15 million fundraising capital campaign called *Healthy Futures for All – 2024* to enable Westside Family Health Center to continue, and to expand, our high-quality health care to the community we serve.

We've added dental, mental and behavioral health services, cementing our position as a supportive, nurturing cornerstone of the community. Vision will be added in 2022.

We're a health center that treats each and every one of our patients like family, and recognizes that every family is an integral part of a stable community.

Our new center is located at **3861 Sepulveda Blvd, in Culver City** – the former LA WEEKLY building.

This new easy access location will allow us to **double the amount of patients we can see from 12,000 to over 24,000,** and offer the full array of services and support that our community needs.

Westside Family Health Center's new design is centered around our patients. The quick check-in lobby is designed to greet them in a reassuring, non-threatening and safe atmosphere. From there, they take an elevator to the third floor where they experience an atmosphere of soothing colors and tactile materials that provide a welcoming surrounding to complete their registration. Most services provided take place in the privacy of the exam room. We also offer telehealth appointments to our patients.

Our patients experience comprehensive care in well-planned strategic areas we call “pods”. Each of the four pods contains eight, light-filled exam rooms and a central space for doctors, technicians and dedicated medical assistants. These pods ensure greater patient care and the collaborative sharing of information.

Space for Care. Space for Support.

The second floor houses our administrative space, a team member lounge, and a community/conference room to serve both our needs and those of the community.

In total, it is a state-of-the-art clinic. It fuels the energies and passions of our paid and volunteer team members, and inspires a welcoming, comforting and safe feeling in our patients and their families.

This design is carefully thought out, based on what we know about creating user-friendly and efficient health care systems.

We need your help to reach our goal of \$15 million by 2024.

Our Future

As we move into the next 47 years, we have the opportunity to make an even bigger impact on the people, families, and communities we serve.

Help us continue to strengthen the community by providing Los Angeles with quality health care to those in need.

This 21st century community health care center includes:

3X
*the capacity to
expand patient
visits*

**Primary care, dental,
vision & mental
and women's health
services**

**State-of-the-art
health care**

**Accessible
location &
parking**

**A care team assigned
to each patient**

**Reduced wait
times**

Help us meet our goal of \$15 million by 2024. We are more than halfway there.
