Care. Compassion. Community.

Exceptional Health Care for All

Health care is *neither* a privilege *nor* just a right. It is an absolute, basic human *necessity*.

Today's fast changing political climate and the hurdles of our shape-shifting health care system have made it more difficult than ever to deliver quality care to our most vulnerable populations.

For 45 years, Westside Family Health Center has sought to be a haven for multiple generations of patients.

First founded as a women's clinic, Westside Family Health Center now provides comprehensive, high quality, cost-effective health care in an educational and supportive environment that empowers patients to take an assertive role in caring for their well-being through all stages of life.

We are a safe place in the community where women, children and families are treated with dignity and respect, and receive the kind of health care they deserve and that is recognized as the best. We bring humanity to health care.

2019: Our New Home

We'll address the health care issues of today and tomorrow in a new, advanced setting that offers **state-of-the-art care to twice as many patients.**

To get there, we're launching a $15 million fundraising capital campaign called *Healthy Futures for All – 2024* to enable Westside Family Health Center to continue, and to expand, our high-quality health care to the community we serve.

We'll be adding vision, dental, mental and behavioral health services, cementing our position as a supportive, nurturing cornerstone of the community.

We'll be a health center that treats each and every one of our patients like family, and recognizes that every family is an integral part of a stable community.

Our new center will be located at **3861 Sepulveda Blvd, in Culver City** – the former LA WEEKLY building - with a target opening in the winter of 2019.

This easy access location will increase the current square footage three-fold – to 24,000 square feet. **We'll be able to double the number of patients we can see from 12,000 to over 24,000,** and offer the full array of services and support that our community needs.

Westside Family Health Center's new design is centered around our patients. The quick check-in lobby is designed to greet them in a reassuring, non-threatening and safe atmosphere. From there, they will take an elevator to the third floor where they will experience an atmosphere of soothing colors and tactile materials that provide a welcoming surrounding to complete their registration. Most services provided will take place in the privacy of the exam room.

Rendering of future waiting room.

Our patients will experience comprehensive care in well-planned strategic areas we call “pods”. Each of the four pods contains eight, light-filled exam rooms and a central space for doctors, technicians and dedicated medical assistants. These pods will ensure greater patient care and the collaborative sharing of information.

Space for Care. Space for Support.

The second floor will house our administrative space, a team member lounge, and a community/conference room to serve both our needs and those of the community.

In total, it will be a state-of-the-art clinic. It will fuel the energies and passions of our paid and volunteer team members, and inspire a welcoming, comforting and safe feeling in our patients and their families.

This has been a carefully thought out design, based on what we know about creating user-friendly and efficient health care systems.

To make this dream come true, we need your help.

Our Future

As we move into the next 45 years, we have the opportunity to make an even bigger impact on the people, families, and communities we serve.

Help us deliver this dream to West Los Angeles and continue to strengthen the community by providing quality health care to those in need.

This 21st century community health care center will include:

3X

the capacity of patient visits

Primary care, dental, vision & mental and women's health services

3X

the square footage of current center

More accessible location & parking

A care team assigned to each patient

Reduced wait times

Join us in reaching our goal!
